HALOT-MAX

Makes Intelligent Manufacturing stronger

Professional SLA 3D Printer

Self-developed Integral Light Source | New AI Intelligent Brain
Self-developed Slicing Software

Product parameters

Molding Technology	LCD SLA	Z-axis Parameter	Double linear slide rail + Ball screw
Printing Size	293*165*300mm	XY-axis Precision	0.05mm
Product size	480*405*770mm	Printing Thickness	0.03-0.08mm
Specification of print screen	13.3-inch 4K Monochrome Screen	Slicing Software	Creality Print
Net Weight	32.5Kg	WI-FI Management	Built-in Wi-Fi
Light Source System	Integral Light Source	Creality Cloud	Yes
Packing weight	51.2Kg	Power System	100-240V Wide voltage support
Printing Speed	1-4s/layer	Communication Interface	USB2.0/Type A
Interactive System	5-inch Touch Screen	Support Filament	Photosensitive Resin
Support System	macOS, Win7 above	Support Pre-research	CN/English, Subsequent free upgrades to multiple languages (9 countries)

Product Advantages

13.3-inch Large Size

Industrial grade with large size, High printing precision, Broader use scenarios.

Integral Light Source

New generation light source technology for precise optical layout that makes the solidify model more precision.

New generation AI brain

Carrying the brand-new chip and Superb data + image processing performance to improving the Print success efficiency.

High stability Z-axis

Dual linear guide rails of Z-axis+ball screws to achieve micron-level precision operation for more creative work.

4K HD Monochrome Screen

Compared to 2K screen has a higher resolution, Highly detailed reproduction, Service life of 2000h.

CREALITY Slicing Software

Improve user experience, Self-developed slicing software simplifying user interface and operation process. Easy operation.

WIFI-APP Smart Control

Built-in WiFi module, Support print by online, Real-time monitoring for remote print management.

OTA Online Upgrade

Intelligent cloud upgrade, Evolution by one click, Experience the latest firmware quickly to bring a better experience.

New Interactive System

Simplified user interface. No delay, the operation can be operated with one touch.
